Accounting Firm Counts on Westbrook's Electronic Document Management

The accounting firm of Leaf, Salzman, Manganello, Pfeil & Tender in Fairfield, N.J., is turning to document management to reclaim physical space crowded with file cabinets.

The certified public accounting firm purchased its electronic document management software from Westbrook Business Partner PMI Imaging Systems, Mount Laurel, N.J.

The firm was running out of space claimed by one too many filing cabinets. The firm was renting that space and will now be able to recoup the cost, said Bernie Lapinski, PMI Desktop Imaging Specialist.

The document management software will be used to manage client information as it relates to taxes, correspondence and work papers, Lapinski said.
